½ Per cent.

To find Interest at One-Half Per Cent. (½%) use the 5 Per Cent. Table and move the decimal point one place to the left.

Example: 60 days interest on $1,000 at 5%=$8.33;
at ½%=$ .833

---

1 Per cent.

To find Interest at One Per Cent. (1%) use the 10 Per Cent. Table and move the decimal point one place to the left.

Example: 90 days interest on $4,000 at 10%=$100.00;
at 1%=$10.00

½ 1 5 6 6½ 7 8 9 10 12 365

EXPLANATIONS

WE USE for periods to separate dollars from cents in the Interest the *integer* of the principal at the top of each column. This is done to avoid the confusion of having to follow two columns or rows of figures at the same time. The integer period locates you in the right column at a glance and without referring to the principal at the top of the column, and greatly aids speed and accuracy.

Time is given in days, and also months and days—Thus if your time is three months and ten days, 7 per cent., you find the page "3 Months, 7 Per Cent." and find 10 days in the right hand margin; if time is 100 days, you find the same table and then find 100 days in left hand margin.

Example:—To find the interest on $6,666 for three months and twenty-seven days at 7 per cent., we turn to page headed "3 Months, 7 Per Cent." and opposite 27 days in the 6,000 column we find:

Interest on	$6,000 =	$136.50
" "	600 =	13.65
" "	60 =	1.365
" "	6 =	.1365
" "	$6,666 =	$151.6515

If the interest is required on the basis of 365 days per annum, we subtract 1/73 from the interest as given by the 360-day table for the time named; thus, in above example we would take 151.65 ÷ 73 = 2.08, and 151.65 − 2.08 = 149.57. Or, we turn to the Tables "1 Per Cent. on basis of 365 days per annum", find the interest on our principal for the given time at 1 per cent. and multiply this result be the required rate per cent.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Accuracy insures economy. Banks U. S. Maturity Calendar costs 1¢ a day.
This is increased efficiency at an infinitesimal cost.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calendar can also be used for figuring days on Bonds—30 days per month basis.

8 MONTHS, 6 PER CENT.

Total No. Days.	1000	2000	3000	4000	5000	6000	7000	8000	9000	Days over 8 M'ths.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Frequently a day's interest is lost, and possibly many dollars, when the bank teller figures maturity dates in his head.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

The up-to-date Bank Auditor uses Banks U. S. Maturity Calendar.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Accuracy insures economy. Banks U. S. Maturity Calendar costs 1¢ a day.
This is increased efficiency at an infinitesimal cost.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calendar saves time as well as money.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calender can also be used for figuring days on Bonds—30 days per month basis.

2 MONTHS, 8 PER CENT.

Total No. Days.	1000	2000	3000	4000	5000	6000	7000	8000	9000	Days over 2 M'ths.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Frequently a day's interest is lost, and possibly many dollars, when the bank teller figures maturity dates in his head.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Accuracy insures economy. Banks U. S. Maturity Calendar costs 1¢ a day.
This is increased efficiency at an infinitesimal cost.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calendar pays for itself every day it is used.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Do you make loans for 30 day periods or multiples of 30? Banks U. S. Maturity Calendar shows due dates and actual number of interest days.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Frequently a day's interest is lost, and possibly many dollars, when the bank teller figures maturity dates in his head.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Use Banks U. S. Maturity Calendar. It is the best.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calendar shows *legal* holidays observed in all states and territories.

The inferior figures separate dollars from cents in the interest when the principal is full thousands. For the interest on smaller amounts mentally move the separating point as many places to the left as there are ciphers omitted from the principal shown at top of column.

Banks U. S. Maturity Calendar shows actual number of days to any date for a whole year back.

BANKS U. S. MATURITY CALENDAR

is the ***only one*** on the market that has the following features:

1. It shows on each business day a whole year ***ahead*** at a glance.
2. Also a whole year ***back***.
3. Shows ***all*** legal holidays.
4. Shows what legal holidays are observed in ***each state.***
5. Can be used for both the 360 and 365 days basis.
6. Is so arranged that a note cannot be dated or made to mature on a Sunday.

This Calendar may be had for 30 days' free trial without any obligation.

Banks U. S. Maturity Calendar is the standard equipment of all large banks, as well as all the Federal Reserve Banks and their Branches.

Calendar complete with stand . . $4.75
Without stand $3.75
